

THE KEYWAY[®] SYSTEM

Eliminates the irritation and inconvenience of ball head and "T" head hangers.

A CONVENIENCE FOR YOUR GUESTS

The previous method of using rings and other types of receptacles with ball and "T" head hangers is, without question, the most inconvenient fixture in guestrooms today. This opinion is shared by virtually every guest who is confronted with these types of receptacles and hangers.

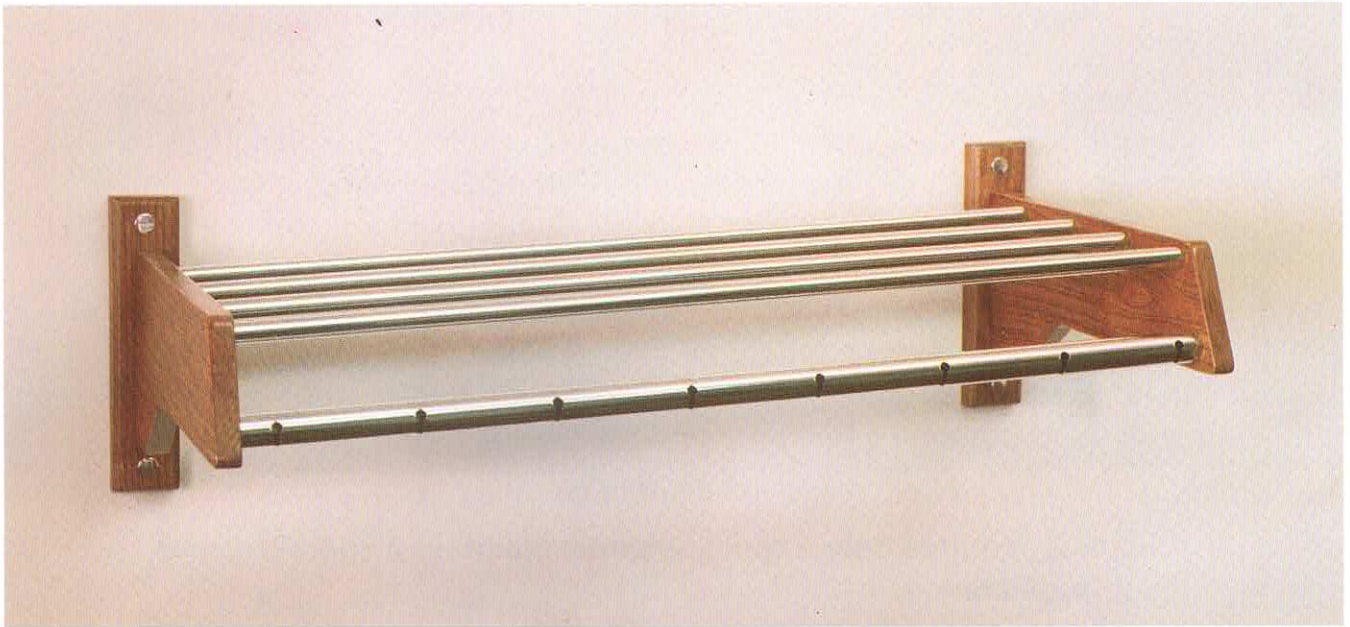

The KEYWAY[®] system has made rings and other receptacles obsolete and provides your guests with a convenience equivalent to that of open hook hangers.

FINANCIAL BENEFITS

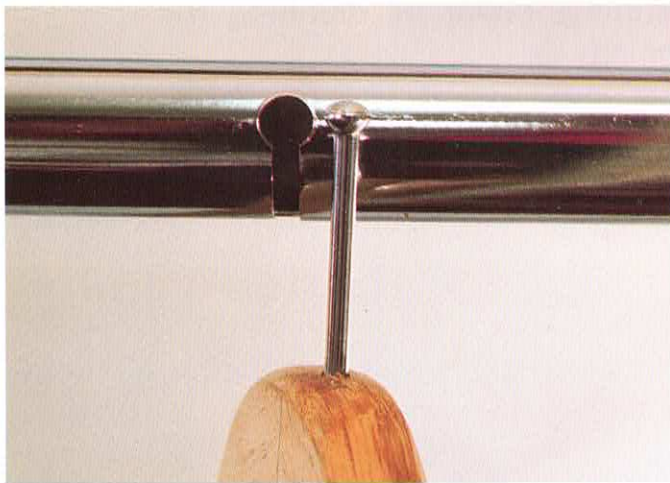

KEYWAY[®] is a complete closet system which can be installed in under 15 minutes. Compare this to the hour to one and a half hours required for installation of shelving supports, shelving, closet rod brackets, closet rod, receptacles and finish painting.

The additional expense of purchasing rings or other receptacles for use with the guestroom hangers is no longer necessary.

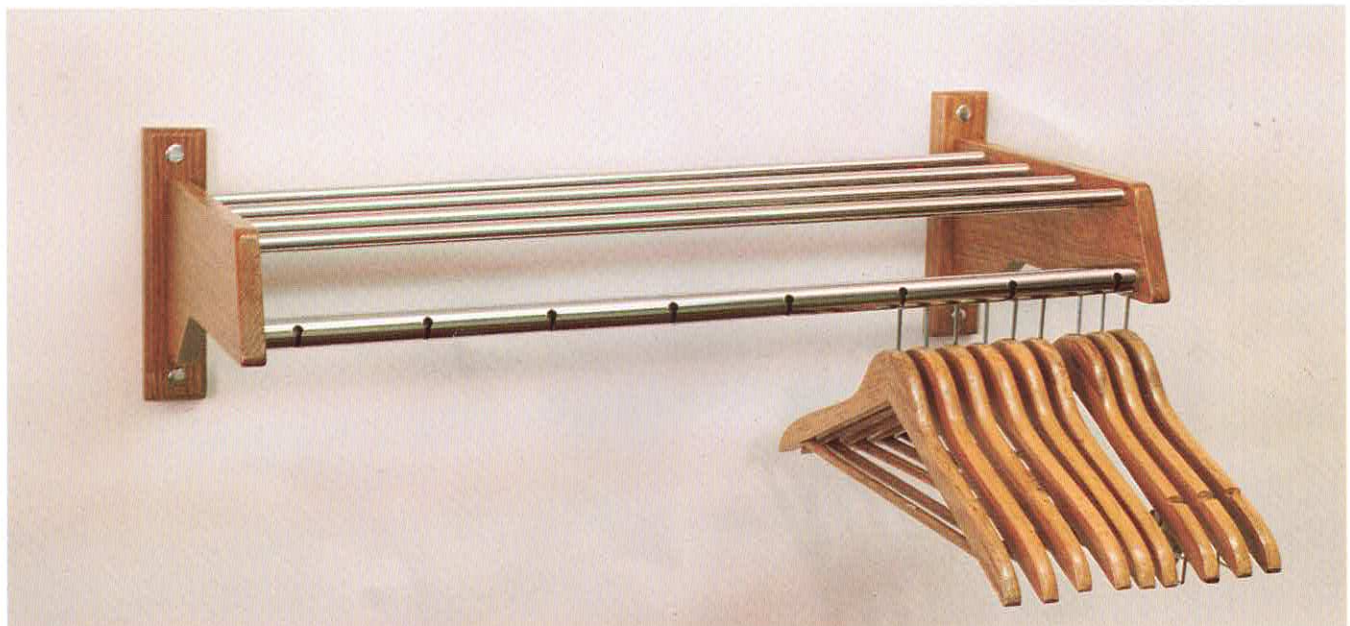

After installation, the KEYWAY[®] system continues to provide financial benefits in the operation of your housekeeping and maintenance departments.

No. 301 series - 30" length

Hangers can be inserted and removed from the KEYWAY'S® hanger bar with virtually the same ease as that of regular open hook hangers.

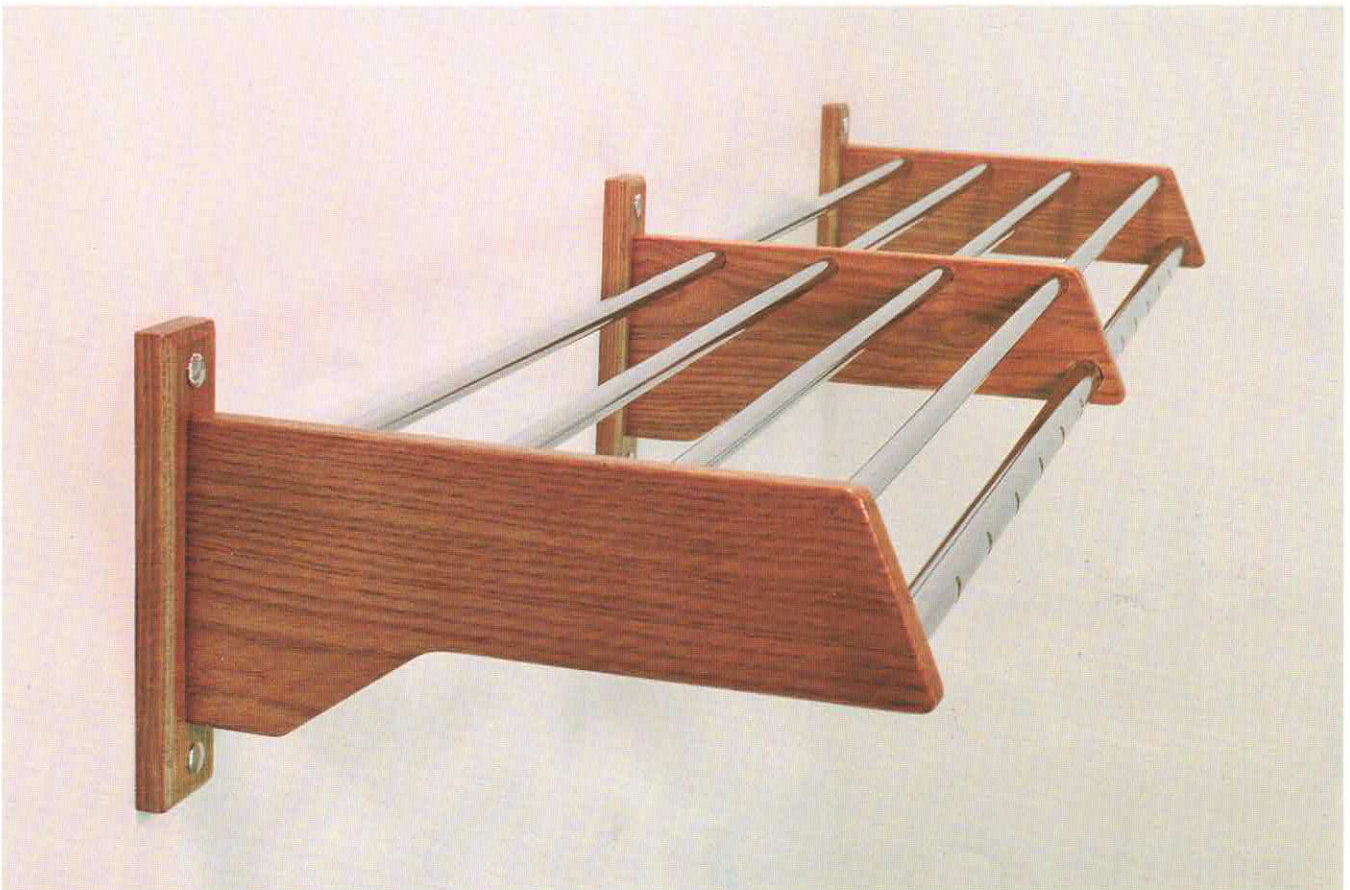

No. 301 series - 30" length

HOUSEKEEPING BENEFITS

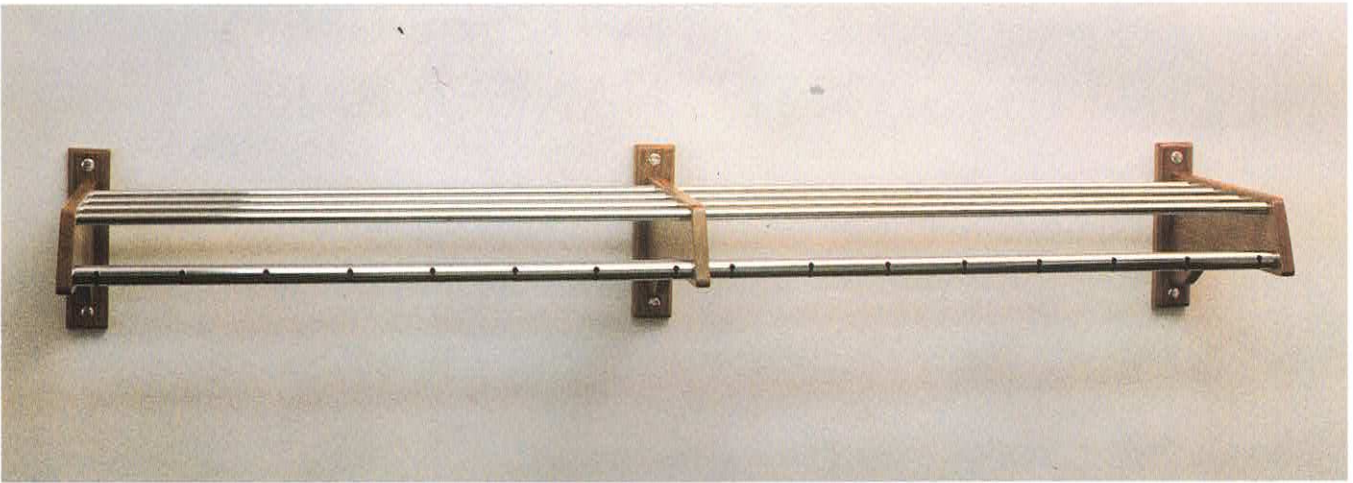

Your housekeeping staff no longer has to respond to a guest's request for additional hangers by installing additional receptacles, offering a guest wire hangers or supplying a standard open hook hanger which can be removed from the guestroom. The KEYWAY'S® special slotted hanger bar allows your housekeeping staff to immediately provide as many hangers as may be required by your guest. Upon the guest's departure, the hangers may be removed to become available for future requests.

Cleaning requires only a quick wipe to maintain a sparkling and fresh appearance.

Articles stored on the unit's shelf always remain visible, thereby greatly reducing the time-consuming chore of reuniting the guests with their forgotten belongings.

No. 301 series - 6 foot length

No. 301 series - 6 foot length

All hardwood construction with multicoats of clear lacquer finish. Available in natural or walnut finishes, solid teak wood or oak. Metal parts are brightly chrome plated.

Attractively designed to brighten closet and alcove areas while providing a convenience which will be appreciated by all your guests.

MAINTENANCE BENEFITS

Standard hanger bars and closet rods become worn and require maintenance or replacement as a result of the constant movement of most hanger receptacles. The KEYWAY'S® design eliminates the use of rings or other receptacles and thus the hanger bar always stays bright and clean. Periodic painting touch up is never necessary.
