

SHALLOW DEPTH CLOSET UNITS FOR KEYWAY® HANGERS

No. 601 series - 36" length

These units are designed for shallow depth closets of under 28 inches. The hanger bar is positioned 11.25" from the closet's back wall. They allow ample hanger and garment clearance in the smallest of closets, while providing a large shelf area. Can be installed in less than 15 minutes. Significantly less expensive than furnishing closet areas with built-in shelving and closet rods. Keyway's unique hanger bar suspension system assures adequate strength and provides up to 4 feet of unobstructed hanger movement.

All of the 601 units have two accessory hooks on the shelf and hanger bar supports. Units of over 48 inches have four accessory hooks. The accessory hooks can be used by the housekeeping department to present closet amenity items such as shoehorns and lint brushes. The accessory hooks also provide the guest with a convenient fixture to hang garment bags, belts, handbags and other items.
